## ABOUT ME

I'm a detail-oriented and experienced QA Engineer delivering reliable, user-friendly, and bug-free software across multiple domains, including Insurance, Banking & Finance, HR, Media Platforms, and Learning Management Systems. I specialize in manual and automated testing, identifying critical issues, and improving product quality throughout the software development lifecycle.

I incorporate AI-assisted testing techniques to enhance test coverage, accelerate defect detection, and optimize testing efficiency. I leverage AI for test case generation, exploratory testing support, and test optimization, while maintaining strong fundamentals in manual and automated testing.

Experienced in Agile and Waterfall methodologies, I collaborate closely with developers and stakeholders to validate requirements, uncover edge cases, and ensure consistent delivery of high-quality software solutions.

## EXPERIENCE

### Software Quality Assurance Specialist

**Kinetic Innovative Staffing Inc.**

Client: **Workerbee.tv Inc** May 2022– November 2024, Winnipeg, Canada(WFH)

- Review the design on Figma before team planning
